
Applying the video technology to the building of social infrastructure

Security cameras help guard us against harm in our everyday lives. At the core of TOA's security business, these devices are becoming more and more prevalent as the myth of Japan as a "safe country" continues to break down.

TOA's goal in this growing market is to provide high- value-added security solutions utilizing digital and networking technologies. Safety entails not only protection from physical harm but also disaster readiness and safeguards for the well-being of all. We will continue to support safety-related infrastructure in these areas by making full use of the remote surveillance technologies honed in our security business.

TOA's security equipment

The Compact V series color cameras, with infrared LED light

A basic model offering high cost performance.
Infrared night vision function and the added advantage of low power consumption.

Digital video recorder for use with security cameras

Many hours of continuous recording at high resolution.
Control of up to 128 cameras possible by linking eight digital video recorders.

The Netcansee Video Network System

Transmits video over a network in real time.
Centralized remote monitoring system covers wide areas and multiple locations.
